

Entrusted Items Concerning Preparation of Draft Proposals for JIS

Newly Established

Divisional Council	T i t l e	Assigned Organization	Contact
Basic Engineering	Technical drawings—Indications of dimensions and tolerances—Part 1: General principles	Japanese Standards Association	A
Basic Engineering	Microbeam analysis—Scanning electron microscopy—Guidelines for calibrating image magnification	Japanese Standards Association	A
Basic Engineering	Methods of colour measurement — Reflecting and transmitting objects	Japanese Standards Association	A
Basic Engineering	Colour specification— Colour difference of object colours	Japanese Standards Association	A
Basic Engineering	Methods of test for fungus resistance	Japanese Standards Association	A
Ceramics	Methods for chemical analysis of sulfur in refractory products and raw materials – Part 2 : Instrumental methods	The Technical Association of Refractories	A
Road Vehicles	Electrical characteristics test methods of electric double layer capacitors for use in hybrid electric vehicles	Japan Automobile Research Institute	A
Medical	Test method for impact resistance of ceramic femoral head for hip-joint prostheses	Japan Fine Ceramics Association	B
Older persons and persons with disabilities	Pressure distribution mattress for home use – Part1: Types	Japan Assistive Products Association	B
Older persons and persons with disabilities	Pressure distribution mattress for home use – Part2: Replace static types	Japan Assistive Products Association	B
Older persons and persons with disabilities	Pressure distribution mattress for home use – Part3: alternating air pressure types	Japan Assistive Products Association	B
Electrical	Residential heat pump water heaters	Japan Refrigeration and Air conditioning Industry Association	B
