

Entrusted Items Concerning Preparation of Draft Proposals for JIS

Newly Established

Divisional Council	T i t l e	Assigned Organization	Contact
Electrical	Measurement principles for terrestrial photovoltaic(PV) solar devices with reference spectral irradiance data	The Japan Electrical Manufacturers' Association	B
Electrical	Measurement methods for energy efficiency and energy consumption of polymer electrolyte fuel cell power systems	The Japan Electrical Manufacturers' Association	B
Electrical	Photovoltaic(PV) module safety qualification - Part 1: Requirements for construction	The Japan Electrical Manufacturers' Association	B
Electrical	Photovoltaic (PV) module safety qualification - Part 2: Requirements for testing	The Japan Electrical Manufacturers' Association	B
Electrical	Test procedure of islanding prevention measures for utility-interconnected photovoltaic inverters	The Japan Electrical Manufacturers' Association	B
Electrical	Wind turbines - Part 3: Design requirements for offshore wind turbines	The Japan Electrical Manufacturers' Association	B
Electrical	Testing procedure of islanding power conditioner for small polymer electrolyte fuel cell power system	The Japan Electrical Manufacturers' Association	B
Electrical	General rules for small solid oxide fuel cell power systems	The Japan Electrical Manufacturers' Association	B
Electrical	General safety code and testing methods for small solid oxide fuel cell power systems	The Japan Electrical Manufacturers' Association	B
Electrical	Testing methods for small solid oxide fuel cell power systems	The Japan Electrical Manufacturers' Association	B
Electrical	Testing methods for environment of small solid oxide fuel cell power systems	The Japan Electrical Manufacturers' Association	B

Electrical	Measurement principles for terrestrial photovoltaic(PV) solar devices with reference spectral irradiance data	OPTOELECTRONIC INDUSTRY & TECHNOLOGY DEVELOPMENT ASSOCIATION	B
Electrical	Plugs, socket-outlets and couplers for industrial purposes	Japanese Standard Association	B
